Mid Cumberland Region's Celebration of Excellence provides recent high school graduates with new laptops from the Department of Children's Services and Connected Tennessee's Computer 4 Kids program

Nashville, TN – On Wednesday, June 5, Connected Tennessee, the Computers 4 Kids program, and Tennessee's Department of Children Services presented 38 foster children from the Mid Cumberland region who are either graduating from high school this spring or on track to graduate and have exhibited positive behavior throughout the school year with new laptops as a way to recognize and celebrate their achievements.

As part of the [Computers 4 Kids: Preparing Tennessee's Next Generation for Success](#) project, the C4K program deploys computers, academic support programs, and workforce training to two disparate, but especially at-risk, populations: those in the state's foster care system who are "aging out" as they turn 18, and youth who are active in the state's 76 Boys & Girls Clubs. The American Recovery and Reinvestment Act-funded program will impact the lives of nearly 60,000 youth across the state throughout the life of the grant – providing a helping hand to youth who are working hard to attain a better life for themselves.

Wednesday's event was held at NovaCopy, Inc. in Nashville and included remarks from State Representatives including Joe Pitts, Mary Littleton, and Joshua Evans. Other speakers such as motivational speaker Paula M. Farmer and DCS Mid Cumberland Family to Family Coordinator Jackie Bryant offered words of congratulations and encouragement to the youth.

"This is such a wonderful endeavor by Connected Tennessee and I am truly grateful for all their hard work with at-risk children," said Representative Littleton. "It is exciting to see academic excellence being rewarded and I look forward to the continued success of this important program over the coming years."

"I am proud of all the kids in this program that have worked so hard to be where they are today," said Representative Evans. "I look forward to seeing even more success in the future and encourage each and every one of them to never give up on their hopes and dreams."

"This program is a great example of when policy matches practice," said Representative Pitts. "Technological proficiency is vital in a 21st century workplace and we are proud of everyone in this room for taking the initiative to be prepared for the future."

In five years, the Computers 4 Kids program has:

- Awarded more than 4,400 computers to youth in need across the state
- Supported all 76 of the state's Boys & Girls Clubs
- Provided computers to more than 2,890 foster youth aging out of the Department of Children's Services program
- Helped the Boys & Girls Clubs in Tennessee youth to complete over 90,000 hours of computer training
- Impacted all 95 counties in Tennessee

The "*Preparing Tennessee's Next Generation for Success*" project is a result of a \$2.3 million American Recovery and Reinvestment Act grant awarded to the C4K program in August 2010 by the U.S. Department of Commerce's National Telecommunications and Information Administration's Broadband Technology Opportunities Program (BTOP). BTOP provides grants to support the deployment of broadband infrastructure, enhance and expand public computer centers, and encourage sustainable adoption of broadband service.
