South Central Region's Celebration of Excellence provides students and recent high school graduates with new laptops from the Department of Children's Services and Connected Tennessee's Computer 4 Kids program

Nashville, TN – On Saturday, June 1, Connected Tennessee, the Computers 4 Kids program, and Tennessee's Department of Children Services presented 38 foster children from the South Central region who are either graduating from high school this spring or on track to graduate and have exhibited positive behavior throughout the school year with new laptops as a way to recognize and celebrate their achievements.

As part of the [Computers 4 Kids: Preparing Tennessee's Next Generation for Success](#) project, the C4K program deploys computers, academic support programs, and workforce training to two disparate, but especially at-risk, populations: those in the state's foster care system who are "aging out" as they turn 18, and youth who are active in the state's 76 Boys & Girls Clubs. The American Recovery and Reinvestment Act-funded program will impact the lives of nearly 60,000 youth across the state throughout the life of the grant – providing a helping hand to youth who are working hard to attain a better life for themselves.

Saturday's event was held at the First Cumberland Presbyterian Church Family Life Center in Columbia and included remarks from State Senator Jim Tracy, former foster youth and current DCS staff member Michelle Crowley, Connected Tennessee Executive Director Corey Johns, and DCS Regional Administrator Lisa Williamson.

Senator Tracy emphasized the importance of having PRIDE (Potential, Responsibility, Influence, Determination, Enthusiasm). He said, "Every individual in this room has the potential, responsibility, influence, determination, and enthusiasm to do great things."

Crowley was able to share her experiences in the foster care system as well as offer some inspiring words for the youth.

“I know that everyone in this room is very, very strong. We can put work into positive things and change our lives,” she said.

The foster youth were eager to share their excitement. One of the students receiving a laptop said, “This laptop is going to make it a lot easier to set and complete the goals for my future.”

In five years, the Computers 4 Kids program has:

- Awarded more than 4,400 computers to youth in need across the state
- Supported all 76 of the state’s Boys & Girls Clubs
- Provided computers to more than 2,890 foster youth aging out of the Department of Children’s Services program
- Helped the Boys & Girls Clubs in Tennessee youth to complete over 90,000 hours of computer training
- Impacted all 95 counties in Tennessee

The “*Preparing Tennessee’s Next Generation for Success*” project is a result of a \$2.3 million American Recovery and Reinvestment Act grant awarded to the C4K program in August 2010 by the U.S. Department of Commerce’s National Telecommunications and Information Administration’s Broadband Technology Opportunities Program (BTOP). BTOP provides grants to support the deployment of broadband infrastructure, enhance and expand public computer centers, and encourage sustainable adoption of broadband service.
