Interactive Map Offers Unique Tools to View Tennessee's Technology Landscape, Guide Expansion Efforts

[Access My ConnectView here](#)

Nashville, TN – Connected Tennessee today unveiled an innovative new broadband mapping tool offering unmatched views of Tennessee's technology landscape.

The mapping tool, called My ConnectView™, is a valuable tool for consumers, policy makers, Internet providers, and planning teams working to increase broadband access, adoption, and use in communities across the state and nation.

"We could not be more excited to be able to unveil My ConnectView in Tennessee. This new tool is going to paint a much clearer and more concise picture of the status of broadband in Tennessee communities for consumers and businesses alike," said Connected Nation GIS Services Manager Ashley Littell. "It is truly a critical factor in the success of our continued implementation of strategic technology planning in all 95 counties across the state."

My ConnectView, developed by Connected Nation, Connected Tennessee's parent organization, replaces the previous mapping tool and is faster and easier to use; features more interactive data layers and additional tools to explore data; and allows users to e-mail, print, and send feedback on custom maps.

By offering unprecedented views of unserved and underserved areas of Tennessee, My

ConnectView will help drive economic development planning centered around broadband technology expansion efforts in Tennessee.

Connected Tennessee has just completed its 5th round of broadband data updates to the National Telecommunications and Information Administration. The data, gathered as part of the State Broadband Initiative program, is used to populate the National Broadband Map. The new maps are online and can be accessed under the [learn tab](#) on the Connected Tennessee website.

We urge citizens and providers to use the tool to help us verify the information presented and to contact us if they can't get access to broadband. Connected Tennessee uses such feedback to ensure the maps are accurate and to reach out to providers and community leaders to promote broadband expansion into unserved and underserved areas of Tennessee.
